

Intermediate Section with Roller

- Unmounted roller section for transverse conveying of workpiece pallets between parallel conveyor sections at a distance of $a = 45$ to 135 mm
- Use in conjunction with two HQ 2 lift transverse units

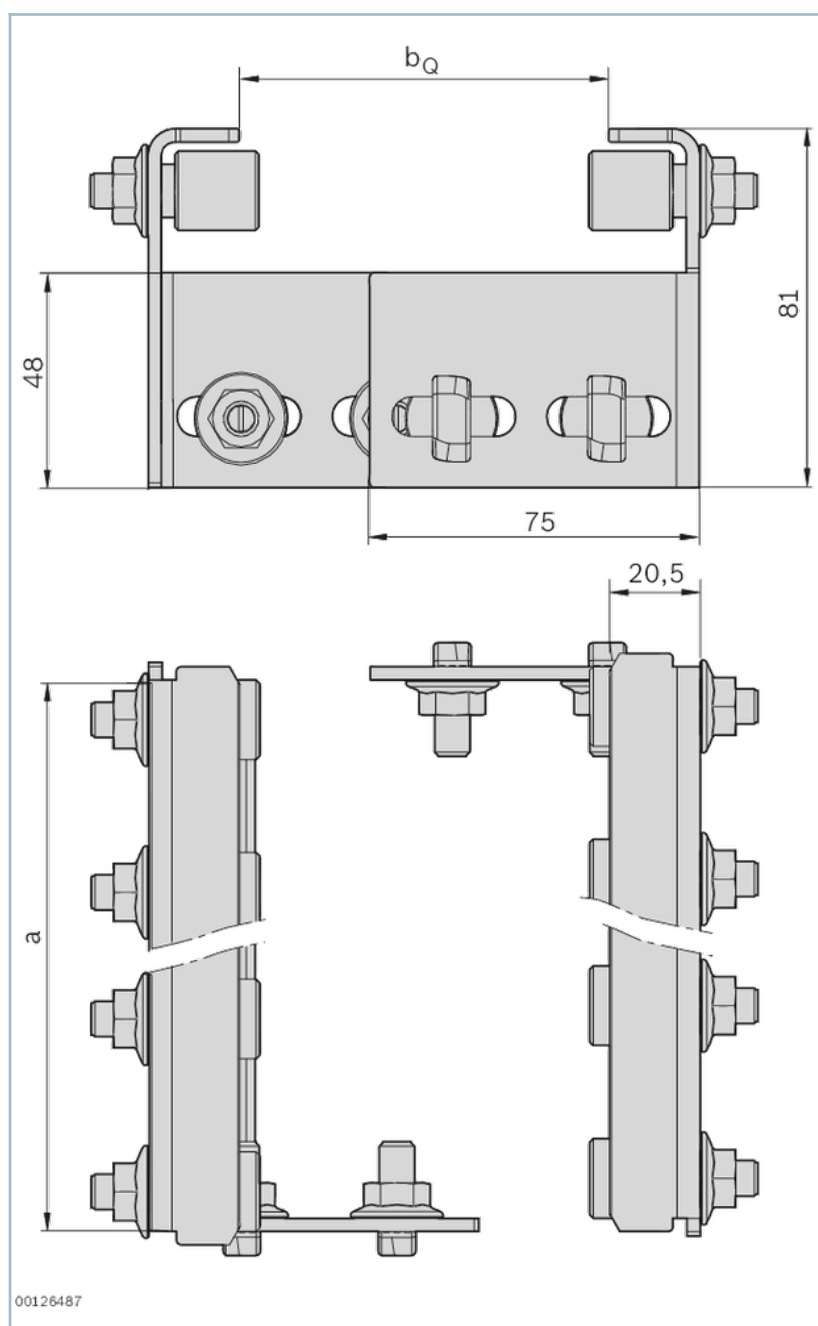

- Without own drive
- Conveyor medium: Rollers made of galvanized steel
- Reversible operation possible
- Suitable for mounting on an ST 2/... section with a profile width of 45 mm or an ST 2/...-H section with a profile width of 50 mm

Product description

Installation between two ST 2 conveyor units or BS 2 belt sections for transverse conveying. Alternatively, use as an inclined passive conveyor section.
