

Pressure wave control strip, pressure wave sensor, connection adapter

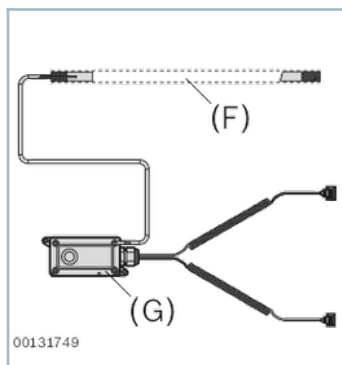

- F→Pressure wave control strip
- E→Connection adapter
- G→Pressure wave sensor

Product description

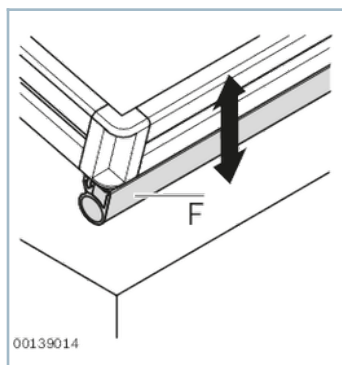

Pressure wave control strip (F), pressure wave sensor (G)

- A pressure wave control strip (F) can be connected to the control unit to protect against mechanical collisions. Even if only slight pressure is applied to the pressure wave control strip, the pressure wave sensor (G) sends a signal to the control unit and the lifting modules move a few millimeters in the opposite direction. The pressure wave control strip has a self-adhesive rear side and can be individually shortened.
- The pressure wave sensor (G) can be connected to up to two control units.

Pressure wave sensor (G) with pressure wave control strip (F)

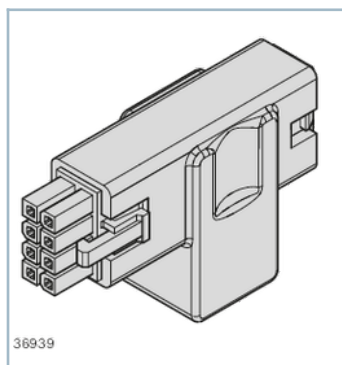

Pressure wave control strip (F)

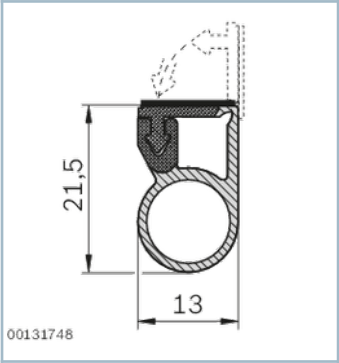

Connection adapter (E)

- Between lifting module and control for the connection of a pressure wave control strip

Dimensions

Pressure wave control strip
