

License protection for USB

For the per-vehicle licensing, a license is bound to a specific host machine. Thus, one license per Rexroth ROKIT Locator is needed. Entitled licenses can be activated and downloaded from the Bosch Rexroth Licensing Center. Each license needs to be bound to a Host ID. A Host ID is a unique identifier which allows identification and thereby licensing of a single host machine running a ROKIT Locator. A Host ID is obtained from a ROKIT Locator via API or the graphical user interface aXessor if a trustworthy licensing anchor is present on the host machine. The dongle is supported as anchor.

Technical specifications

- ▶ Interface: USB A-type connector
- ▶ Full Speed USB 2.0 – USB 3.2 compatible
- ▶ Data retention: 10 years at room temperature
- ▶ Power supply: 5V bus-powered, < 20 mA (LEDs off, typical 6 mA), < 50 mA (both LEDs on)
- ▶ Operating and storage temperature: -25°C to +85°C, non-condensing
- ▶ MTBF (Mean Time Between Failures): > 3 million hours at +25°C
- ▶ Case / Dimensions: 12 mm x 16.65 mm x 4.5 mm
- ▶ Weight: 1.46 g
