

Connection kit for connecting the transverse section

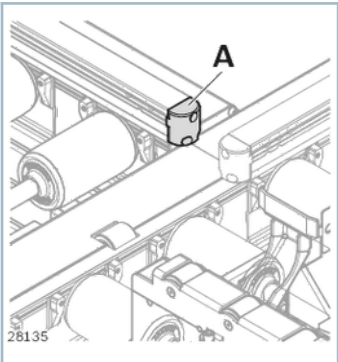

- For connecting the transverse section, independent of the drive side of the main section. If a circuit only consists of lift transverse units, the transverse sections are connected directly to the longitudinal section

- Support brackets made from galvanized steel incl. covers for the open profile ends of the transverse section
- **Guide kit**
- The guide kit is part of the connection bridge.
- To connect a standard section, the guide kit must be ordered separately.

Product description

Guide kit (A)

Set up of transverse conveyor

Delivery notes

Condition of Delivery

ST 5/XH, ST 5/H connection kit	Not assembled
Connection kit ST 5/OC DD = 2 1)	
Connection kit ST 5/OC DD = 1 1)	
TS5 guide kit	

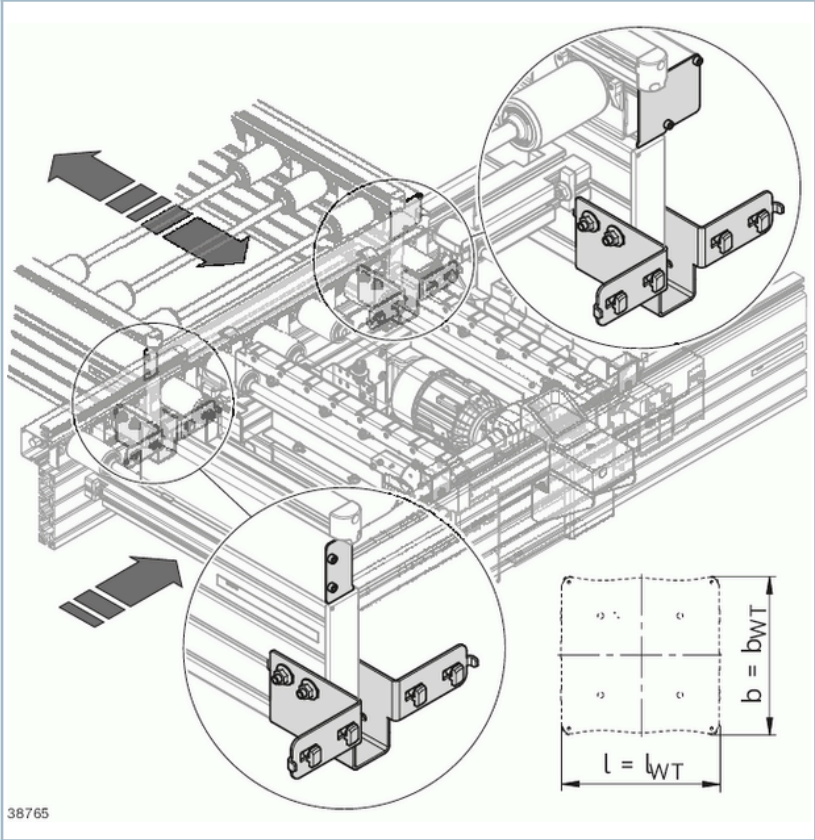

1) DD = drive 1: on one side 2: on two sides

Scope of delivery

ST 5/XH, ST 5/H connection kit	2 support brackets incl. fastening material for assembly
Connection kit ST 5/OC DD = 2 1)	
Connection kit ST 5/OC DD = 1 1)	
TS5 guide kit	2 guide aids incl. fastening material for assembly

1) DD = drive 1: on one side 2: on two sides
