

Base Pallets

- The base pallet is the interface between the transfer system and the carrying plate with workpiece fixtures
- The base pallet is designed to deal with the highest loads

- 6 standard sizes
- Optimized contours for easier movement through curves
- Stop gate stop on interior and exterior of the workpiece pallet surface (in the longitudinal conveyor direction)
- Can be combined with mobile data tags from the ID 200 RFID system

- ADamping element
- BHolder for ID 200 data tag
- CStop gate feed-through
- DMounting for positioning bushing
- EGuide rollers

Accessories

Required accessories

Attachment kit incl. rollers, roller pins, damping elements and sensor plates

Recommended accessories

- Positioning bushing kit
- Carrying plate

Base Pallet accessories

- Attachment kit
- Positioning bushing kit

Carrying Plates, standard sizes

- For combination with a base pallet to form a WT 5 workpiece pallet
- For finishing fixtures by the user

Carrying Plates, variable dimensions

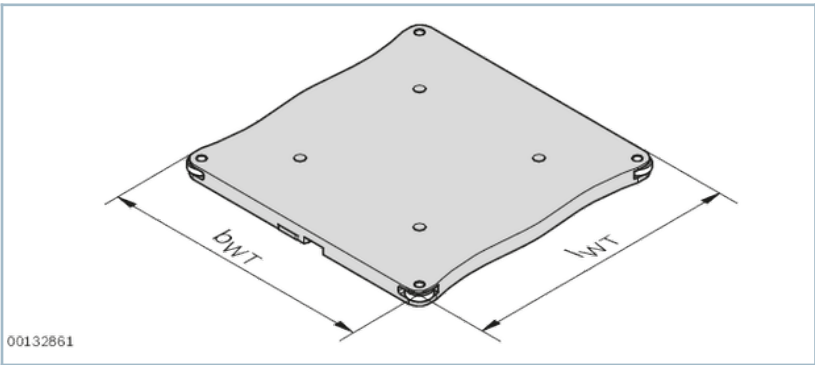

- For combination with a base pallet to form a WT 5 workpiece pallet
- For finishing fixtures by the user

Delivery notes

Condition of Delivery

Not assembled, attachment kit available, without carrying plate
