

Assembly module

[PDF](#) Assembly instructions

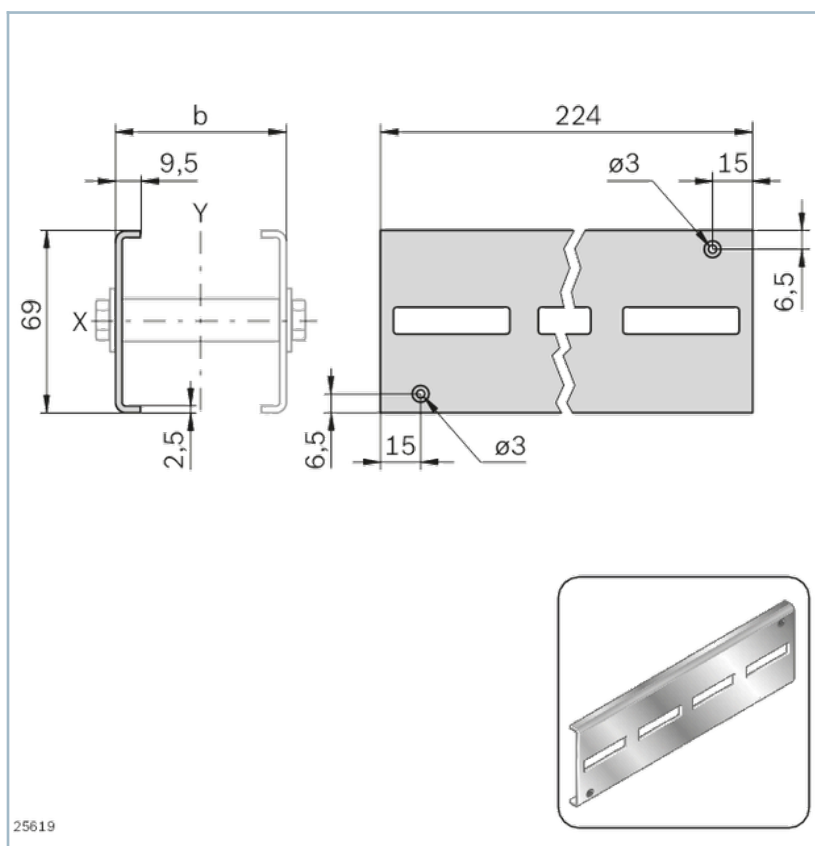

Product description

The assembly module is used for inserting and closing or opening the chain. It can be installed at any point on the conveyor section that is easy to access in operation. The assembly module is intended for sections with drives without a chain bag (e.g. wedge conveyor).

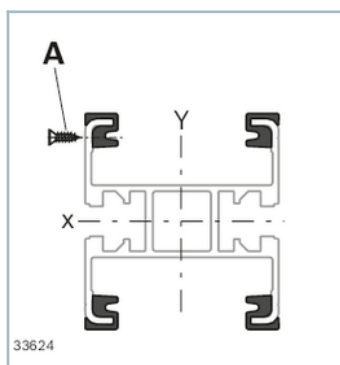

- Max. distance from the nearest supports on both sides is 500 mm
- The support profile with slide rail is not interrupted in the assembly module, enhancing smooth running
- Slide rail interruption is only required on the side to be opened

Dimensions

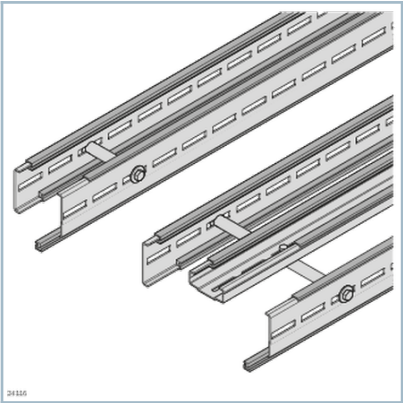

Assembly module STS

Sliding rail ESD VFplus

Accessories

Slide rail

- Easy assembly - simply clip onto the section profile
- Secured against axial shifting due to lateral bolting
