

Accumulation roller chain with steel accumulation rollers

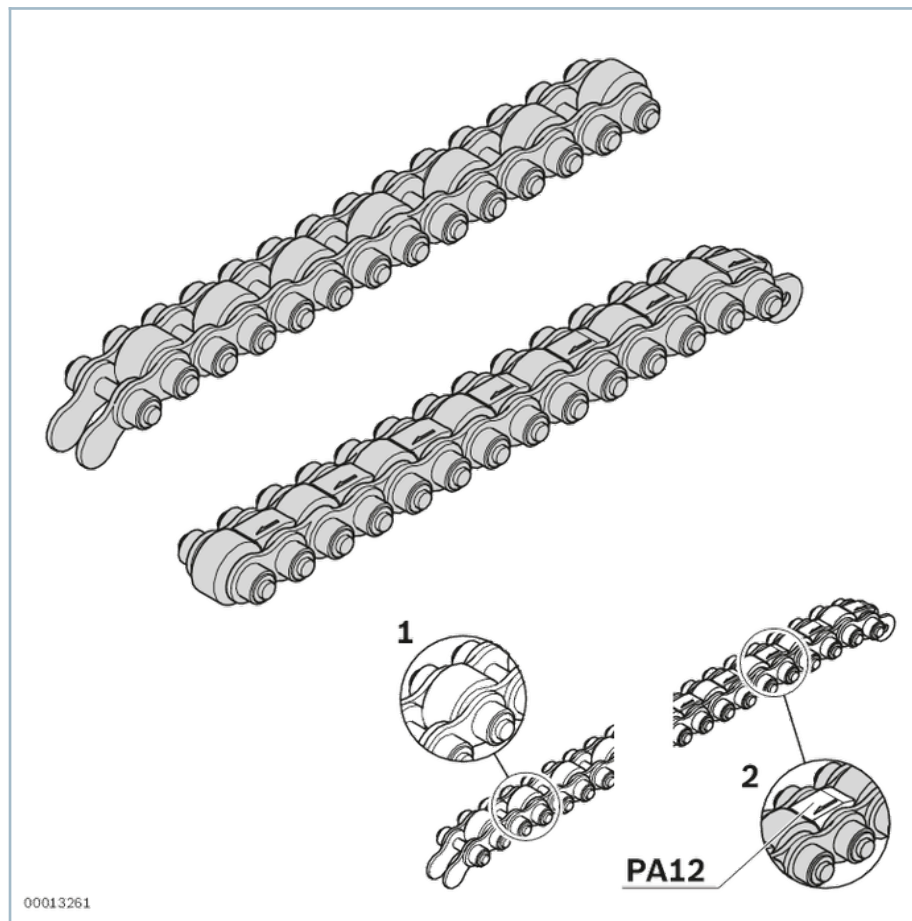

- Conveyor medium for the workpiece pallets
- For conveyor unit self-assembly

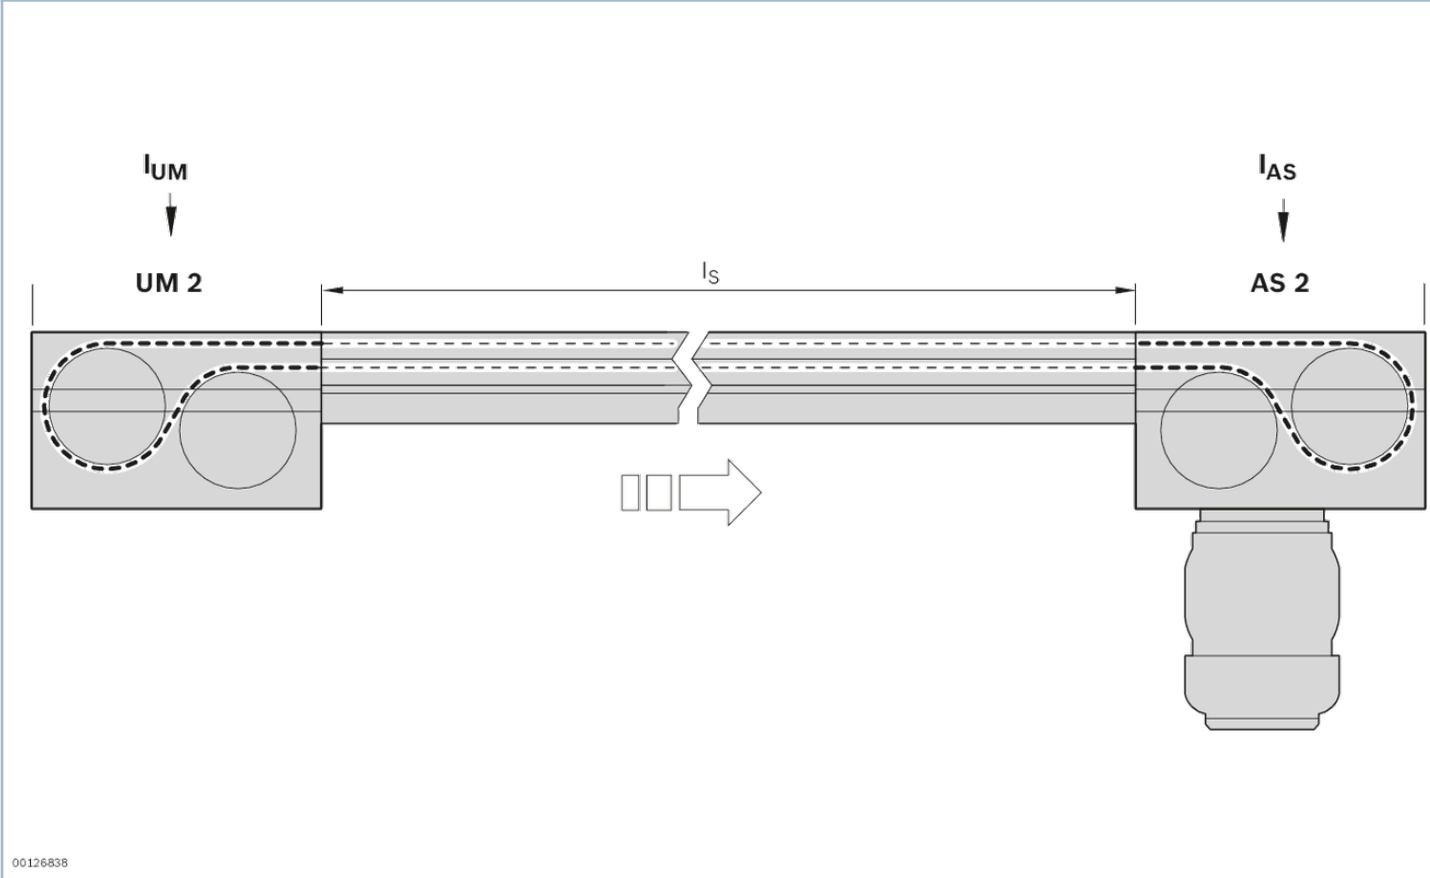

- For use in conjunction with ST 2/R and ST 2/R-H conveyor units
- Delivered in units of up to 12,000 mm. Lengths of $l > 12000$ mm can be produced by connecting several accumulation roller chains using master links
- Chains are available with small parts protection (= filler pieces in the accumulation roller chain prevent small parts from pinching)

Product description

Note: Reversible operation is not possible in conjunction with small parts protection.
